garson restaurant management system

Software that offers complete IT management of bars, restaurants and other hospitality facilities by monitoring points of production, sale and distribution.

With Garson, hospitality venues gain many advantages: faster service, more satisfied customers, bigger turnover, better employee control, regularly updated stocks, better insight in financial management and modern way of conducting business.

The software supports operation with touchscreen POS terminals and wireless Android terminals.

garson restaurant mobile suite

A set of Android applications that work in conjunction with Garson Restaurant Management System with a goal of increasing staff productivity, overall efficiency of the venue and increased customer satisfaction. Garson Mobile Suite consists of three applications:

Garson Fly, a mobile Point of Sale, reduces service time and increases the efficiency of issuing orders and bills by taking orders and collecting payment at the table.

Garson Live, application that offers management staff a real-time insight into all the important aspects of daily operations via Android mobile device, such as live log of events, turnover according to different criteria, active orders and more.

Garson Analytics, tool that enables owners to check and analyse operations at the venue remotely on their Android device.

hotelier hotel management software

Hotelier is an information system for hotels, motels, hostels, spa and wellness centers, resorts, lodgings, and other types of tourist, recreational, therapeutic or similar accommodations.

It covers all aspects of hotel operation and connects and supervises the work of all parts of the establishment: the reception, points of sale in restaurants and bars, kitchens, storages, and mini bars.

The system can be used with the latest hardware solutions (wireless devices, touch screens, RFID cards, PBX systems, electronic locks etc.), in order to modernize and speed up your business.

helix suite health, spa & wellness systems

A set of solutions for creating and keeping electronic records, automated scheduling, charging, and keeping financial records in medical practice, fitness/wellness centers and spa resorts. Helix applications enable unified access to all patient and business data with simplified content management and easy customizable options. Every service, appointment, document, bill, image and notification is available at the touch of a button.

emr and health management system

scheduling and waiting room // diagnostic and treatment templates // comprehensive documentation // text messaging // email communication // security and confidentiality
